

Farzin Ghanavati

completed the RWTH Certification Course "Fellowship Status Laser Therapy in Dentistry" from 19 January 2011 to 30 April 2013 and successfully passed the certification exam.

Herewith he is awarded the

**RWTH Certificate
"Laser Therapy in Dentistry"**

Within the scope of the Fellowship Status Certification Course, the theoretical and biophysical backgrounds as well as all appropriate clinical indications and clinical pertinences of the most important wavelengths were taught. Moreover, basic knowledge of laser physics and safety, laser construction and handling, and laser diagnostics were thoroughly explored. The practical part included hands-on training, skill training and surgery demonstrations. Clinical cases were individually compiled and presented.

The focus was on the following wavelengths:

- Diode Lasers (650/ 810/ 940/ 980 nm)
- Erbium Lasers (2.790/ 2.940nm)

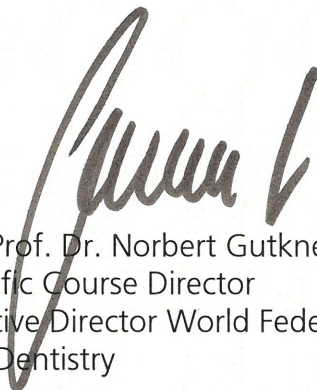

The course was organised by the RWTH International Academy, the academy for continuing education of the RWTH Aachen University and the Aachen Dental Laser Center (AALZ).

The Scientific Director of the RWTH Certificate Course was Univ.-Prof. Dr. Norbert Gutknecht.

Aachen, 30 April 2013
